

## News Release

### Introducing the Long-awaited Mobile Addition to the NX-1000 Series: One-“K”-Fits-All Solution Radios Packing NXDN/DMR and FM Analog

JVCKENWOOD Corporation is pleased to announce the launch of NX-1000 Series professional two-way mobile radios, expertly engineered to complement the NX-1000 Series portable models already in service. This One-“K”-Fits-All solution offers multiprotocol support, including the choice of digital CAI – either NXDN or DMR – as well as mixed-mode operation to ensure seamless integration with legacy radios and existing systems while smoothing the onward migration path to digital. FM analog only models are also available.

#### **Product concept**

KENWOOD has the advantage of many decades of experience in harnessing advanced technologies for both audio and wireless applications. This is manifested in an impressive lineup of leading-edge products that are consistently ahead in innovation and performance – especially audio quality, the key to clear communications. While drawing on these strengths, the NX-1000 Series has been conceived as a single, cost-effective platform that offers the latest digital protocols plus the ability to satisfy the widest range of user requirements. NX-1000 Series portables have already won wide acclaim, and these new mobile radios share the same programming software and provide the same functionality and user experience as the portable models. This close partnership also benefits those involved in procurement and maintenance, enhancing business efficiency.

#### **Product details**

Distinguished by the white backlit LCD display and 7-color LED indicator, which together offer at-a-glance confirmation of operational status, these new mobile radios emphasize visual clarity and ease of use. Complementing the smart layout of the front panel is renowned KENWOOD audio performance – with 6W maximum output and optimizable TX/RX audio quality. Among the many convenient features are display customization, various scan functions, and an orange emergency button. (Note that these models do not support the installation of optional boards or removable front panels.)

NXDN™ is a trademark of JVCKENWOOD Corporation and Icom Inc. NEXEDGE® is a registered trademark of JVCKENWOOD Corporation. All other company names, brand names and product names are registered trademarks or trade names of their respective holders.
